

FILA TENNIS CLUBWEAR 2024

These icons provide important technical information about the garment's construction and performance.

Quick Dry

Due to the open-pored construction a fast moisture transport is guaranteed. Thanks to its quick-drying features, the material always feels pleasantly dry. It is also breathable and temperature regulating.

Soft Touch

Our highly functional materials has been developed for the highest requirements. Thanks to a special surface structure, a soft touch and comfortable feel are also guaranteed.

Breathable

No matter how hard you play - our highly breathable fabric guarantees excellent moisture transport and thus ensure a comfortable and dry body climate.

High Wearing Comfort

Highly functional textiles and a naturally comfortable feel are not incompatible. We therefore always take care to create fabrics that ensures maximum comfort next to your skin.

Easy Care

Our textiles have been developed for highest demands, especially for the requirements of sporting activities. This means that they are exposed to higher mechanical stress, especially through frequent washing. That is why we have designed our fabrics to be long-lasting and extremely easy to care for.

Dry Comfort

Composed by multiple cross-section yarns and high-tech finishing process. Dry comfort fabric lead sweat away from body and offer you a quick drying and pleasant feeling after exercising.

Recycled materials used in this garment

Beside the fact that we pay attention to durability and multifunction when developing our fabrics, nowadays there are effective possibilities to produce highly functional textiles with fabrics that have less impact on our environment. We are constantly identifying new opportunities to implement them in our products.
